Niladri Pradhan

niladri.pradhan@email.com | +91 8436545329 | linkedin.com/in/niladripradhan | github.com/niladripradhan

Professional Summary

Results-driven **AI Engineer** and BCA graduate with hands-on expertise in **Computer Vision, Machine Learning, and Deep Learning**. Proficient in designing and deploying end-to-end AI solutions using **YOLOv8, TensorFlow, OpenCV, and Python**. Demonstrated ability to build real-time object detection, OCR, and NLP-based systems with measurable business impact. Seeking a challenging role as an **AI Engineer, Machine Learning Engineer, Computer Vision Engineer,** or **Data Scientist** to contribute to innovative AI-driven products.

Technical Skills

Programming Languages: Python, JavaScript (ES6+), SQL

Frontend Development: React.js, HTML5, CSS3, Responsive Design, Component Architecture

Backend Development: Node.js, Express.js, REST API Design, JWT Authentication, Bcrypt

Database Technologies: MongoDB, Mongoose ODM, MySQL

AI / Machine Learning: Machine Learning, Deep Learning, CNNs, TensorFlow, YOLOv8, Scikit-learn

Computer Vision & OCR: OpenCV, EasyOCR, Image Processing, Real-Time Object Detection

Data Science: Data Analysis, Feature Engineering, Model Evaluation, Data Preprocessing

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, FastAPI

Projects

AI-Powered PPE Safety Detection Web Application | *React.js, Python, YOLOv8, OpenCV, FastAPI* **2025**

- Developed a web-based workplace safety monitoring system using YOLOv8 and OpenCV.
- Implemented real-time detection of safety helmets and reflective vests from uploaded videos and live camera feeds.
- Built an automated alert system to identify and report PPE compliance violations.
- Designed an interactive dashboard for monitoring safety incidents and viewing detection statistics.
- Optimized object detection performance to enable accurate real-time inference in industrial environments.

AI Resume Screening Web Application | *React.js, Python, NLP, Machine Learning, MySQL* **2025**

- Developed a web-based AI recruitment platform that automates resume screening and candidate ranking.
- Implemented NLP techniques to extract candidate skills, education, and experience from uploaded resumes.
- Built a machine learning model to match resumes against job descriptions and generate candidate scores.
- Designed a recruiter dashboard for automated shortlisting and candidate management.
- Reduced manual resume review effort by automating candidate evaluation and ranking workflows.

Smart Document OCR Web Application | *React.js, Python, EasyOCR, OpenCV, MySQL* **2025**

- Built an AI-powered web application for extracting text from scanned documents, images, and PDFs.
- Integrated EasyOCR and OpenCV to perform accurate Optical Character Recognition with image preprocessing.
- Implemented document upload, text extraction, and download functionality for editable outputs.
- Developed document history and storage management using MySQL database integration.
- Automated document digitization workflows, reducing manual data entry and improving accessibility.

Education

Bachelor of Technology (B.Tech) in Information Technology **2022 – 2025**
Seacom Engineering College *Howrah, West Bengal*

Diploma in Computer Science and Technology **2020 – 2022**
Central Calcutta Polytechnic *Kolkata, West Bengal*
